EXPLANATION OF FORMAT

The period covered by this issue of the bibliography corresponds to the same months of *Index Medicus*. The journal coverage is limited to journals covered by *Index Medicus*, but the *Endocrinology Index* contains additional subject headings that are not included in *Index Medicus*. The *Endocrinology Index* is arranged in seven sections: 1) Table of Contents; 2) Subject Section; 3) Review Section; 4) Method Section; 5) Author Section; 6) Subject Index; and 7) Author Index.

Subject Section

The Subject Section is for the reader interested in recent literature related to certain broad topics and is divided into eight categories (pituitary, thyroid, etc.). The endocrine pancreas has not been included since it is the subject of another recurring bibliography, *Diabetes Literature Index*. Each category has a preconceived hierarchical organization of subject headings. A particular citation may appear more than once if it deals with multiple topics. Each citation to an article contains the full title, first author, and journal reference. If the article is written in a foreign language, the language is indicated. If the citation is to a review article, the number of references is given.

Author Section

The Author Section provides the reader with a list of keywords or index terms assigned to each citation. Each article appears only once. The citations are arranged alphabetically according to first author and are numbered consecutively. These numbers are then in the Author and Subject Indexes to enable the to identify references with ease. The complete cit (including index terms) are found but only the three authors are listed. Foreign titles appear original language; these titles have been tran into English in the Subject Section. Following citation are index terms which have been assign describe the contents of the article. Index terms a in capital letters; some of these are accompani subheadings which appear in lower case letters. isks (*) identify the index terms under which a appear in *Index Medicus*.

Subject Index

All of the index terms assigned to the citations ap ing in the bibliography are listed, followed by ci numbers which correspond to the numbers in the A Section. The Subject Index is included for the venience of the reader who wishes to select ar falling in categories of his own conception. Fo ample, one who is interested in protein binding particular hormone could quickly find whether were any articles dealing with this subject by dete ing if there were any citation numbers common t two headings "protein binding" and the name o specific hormone.

Author Index

The names of all authors are listed, followed by cit numbers which correspond to the numbers in the A Section.

DISTRIBUTION

This publication is available free to National Institutes of Health grantees and contractors working in the field of endocrinology and libraries of medical schools. Requests from these qualified individuals to receive free copies of this publication must include their grant or contract number and the title of their project. These requests as well as address changes and other communications should be addressed to:

Scientific Communications Office
Endocrinology Index
National Institute of Arthritis, Metabolism, and Digestive Diseases
National Institutes of Health
Building 31, Room 9A–03
Bethesda, Maryland 20014

Other individuals and libraries may receive this publication by subscribing *directly* to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. One year's subscription includes 6 bimonthly issues. Subscription price per year in the United States, Canada, and Mexico, $16.00; foreign, $4.00 additional; and $2.75 for a single copy. Payment is required in advance, and check or money order should be made payable to the Superintendent of Documents.

The Secretary of the Department of Health, Education, and Welfare has determined that the publication of this periodical is necessary in the transaction of the public business required by law of this Department. Use of funds for printing this periodical has been approved by the Director of the Office of Management and Budget through April 30, 1975.

ACKNOWLEDGMENT

The *Endocrinology Index* was compiled with the cooperation and assistance of the staff of the National Library of Medicine. The citations were processed by the Library's computer-based Medical Literature Analysis and Retrieval System (MEDLARS) and were printed from film composed by Graphic Arts Composing Equipment (GRACE), MEDLARS' high-speed phototypesetter.

PREFACE

The *Endocrinology Index* is a bimonthly publication of the National Institute of Arthritis, Metabolism, and Digestive Diseases. This selected bibliography which is produced from the National Library of Medicine's Medical Literature Analysis and Retrieval System (MEDLARS), has been initiated to supply those scientists working in the field of endocrinology with a much needed current awareness tool and is intended to help facilitate greater integration of research and clinical efforts in this field.

Endocrinology Index was developed with the support of contract PH43-66-480 in 1966-70 to Vanderbilt University under the direction of Grant W. Liddle. The National Institute of Arthritis, Metabolism, and Digestive Diseases is most appreciative of the fine work in originally developing and editing the *Index* provided by Grant W. Liddle and Victoria Ragin Liddle and for their continuing editorial advice in making the *Endocrinology Index* a most important and necessary component of endocrinology literature within the biomedical research community.

ADMINISTRATION & DOSAGE

Serotonin-induced chronic gastric ulceration and the influence of adrenalectomy. Ozdemir IA, et al. **Am Surg** 38:7-9, Jan 72

BIOSYNTHESIS

In vivo production of steroids with central depressant actions by the ovary of the rat. Holzbauer M. **Br J Pharmacol** 43:560-9, Nov 71

BLOOD

Simultaneous radioimmunoassay of plasma FSH, LH, progesterone, 17-hydroxyprogesterone, and estradiol-17 beta during the menstrual cycle. Abraham GE, et al. **J Clin Endocrinol Metab** 34:312-8, Feb 72

Early adrenal response to ACTH; Plasma concentrations of pregnenolone, 17-hydroxypregnenolone, progesterone, and 17-hydroxyprogesterone. Bermudez JA, et al. **J Clin Endocrinol Metab** 34:241-3, Jan 72

Gamma globulin protection of radioimmunoassay and competitive protein binding saturation analysis of steroids. Leyendecker G, et al. **J Clin Endocrinol Metab** 34:430-3, Feb 72

17 -hydroxyprogesterone levels as a measure of corpus luteum function. Dodson K, et al. **J Endocrinol** 52:x-xi, Jan 72

Progestins in the plasma of a viviparous lizard, Tiliqua rugosa (Gray). Bourne AR, et al. **J Reprod Fertil** 28:156-7, Jan 72

A technique for the assay of 17-hydroxyprogesterone (17-hydroxy-4-pregnene-3,20-dione) in serum using celite column chromatography and competitive protein binding. Stone S, et al. **Steroids** 18:161-73, Aug 71

ISOLATION & PURIFICATION

A technique for the assay of 17-hydroxyprogesterone (17-hydroxy-4-pregnene-3,20-dione) in serum using celite column chromatography and competitive protein binding. Stone S, et al. **Steroids** 18:161-73, Aug 71

METABOLISM

In vitro metabolism of 15 -hydroxyprogesterone by rabbit liver. Bhavnani BR, et al. **Biochemistry** 11:753-61, 29 Feb 72

Inhibition of rat testicular androgen synthesis in vitro by melantonin and serotonin. Ellis LC. **Endocrinology** 90:17-28, Jan 72

Isolation and preliminary characterization of a progestogen specific binding macromolecule from the 273,000 g supernatant of rat and rabbit uteri. McGuire JL, et al. **Endocrinology** 90:496-506, Feb 72

Steroid metabolic pathways in the ovary of the chinchilla (Chinchilla laniger). Tam WH. **J Endocrinol** 52:37-50, Jan 72

Tyrosine aminotransferase induction regulation variant in tissue culture. Levisohn SR, et al. **Nature [New Biol]** 235:102-4, 26 Jan 72

PHARMACODYNAMICS

Uncoupling of oxygen activation from hydroxylation in the steroid C-21 hydroxylase of bovine adrenocortical microsomes. Narasimhulu S. **Arch Biochem Biophys** 147:384-90, Dec 71

Significance of the steroid-induced type I spectral change in steroid C-21 hydroxylase system of bovine adrenocortical microsomes. Narasimhulu S. **Arch Biochem Biophys** 147:391-404, Dec 71

Inhibition of capacitation in the rabbit. Hamner CE, et al. **Fertil Steril** 23:196-200, Mar 72

Effect of some steroid contraceptives on serum proteins of lactating goats. Abdel Kader MM, et al. **J Egypt Med Assoc** 54:17-26, 1971

In vitro inhibition of aldosterone biosynthesis by 17-hydroxylated steroids in rat adrenal. Weinstein RL, et al. **Metabolism** 21:99-106, Feb 72

Effect of 17-hydroxyprogesterone and medroxyprogesterone acetate on the route of in vitro biosynthesis of corticosterone and aldosterone from labelled pregnenolone by bovine adrenals. Patwardhan VV, et al. **Steroids** 18:433-40, Oct 71

THERAPEUTIC USE

Effects of pregnancy and progestational agents on the urinary tract. Marchant DJ. **Am J Obstet Gynecol** 112:487-501, 15 Feb 72
